

# RELEASING CONTACTS FROM QUARANTINE

## HOUSEHOLD CONTACTS

Recommend quarantine for 14 days after case has been released from home isolation (because exposure is considered ongoing within the house)\*\*.

If you are not able to stay home for 14 additional days and you do not have symptoms, you may leave home after 10 days without testing.

*\*\* If you are able to have complete separation from the person in your house with COVID-19 (this means no contact, no time together in the same room, no sharing of any spaces, such as the same bedroom or bathroom), then follow the time frame for non-household contacts.*

## NONHOUSEHOLD CONTACTS

Recommend quarantine for 14 days after the date of last exposure with the person infected with COVID-19.

If you are not able to stay home for 14 additional days and you do not have symptoms, you may leave home after 10 days without testing.
