

How did you meet Hal?

I started working at cici's pizza when I was 15, after I was raped at 14 I came into work with bruises and burn marks. that is the day he took notice

How old were you?

15/16

How did he convince you to move in with him? Or was it your idea? How old were you?

When I was 16 he offered me a place to live. He said he would show me a better life and pay for me to go to college.

When did the sex start?

I was 18, probably a few months after my birthday.

Was it consensual at first? Or was it forced/rape from the start?

I was very intoxicated I didn't say no that time but he had been asking to be with me for a few weeks.

How often? (How many nights a week?)

At first maybe 5 times a week but I was always trying to avoid it. So toward the end maybe 2-3 times a week.

For how long?

From when I was 18-19.

Was he violent?

Not very often. I would just lay there and "check out".

Were you afraid of him? Why? (What was it like to be living with this guy?) Were you allowed to leave the house without him?

I was afraid he would sue me for the money I owed him. I would leave the house sometimes when he was gone. I would have to sneak

Were you threatened? How? around because he would get mad. He would often threaten to sue me.

He would print copies of the money I owed him and leave them all over the house.

How was the relationship at first different from the relationship at the end? He was very nice at first and called me his daughter. After the relationship turned sexual he was very mean, he would always belittle me.

Is there reason to think you were being groomed for "sex trafficking"? In other words...that he would have you do things for other people?

I think more than anything he made me feel like he owned me. to him I was a toy to him like his personal barbie doll. That's what he tried to make me.

Is there evidence that he was a sex predator? What would be on his computer and/or cell phone?

I have police interviews of from two other teenage girls that he was grooming in almost an identical way he did with me.

I could not find any evidence in the discovery about his computer or his phone. I don't know why it was not included
