

AGENDA ITEM REPORT

Date: March 29, 2023
To: Board of County Commissioners
From: Jill deVries Jolicoeur, Assistant County Administrator
Department:
Subject: Presentation of draft Housing and Homelessness 5-year Strategic Plan

BACKGROUND INFORMATION:

In April 2021, Douglas County and the City of Lawrence, joined the Kansas Department of Aging and Disability Services (KDADS), hosted a two-day summit focused on addressing issues of homelessness and housing instability in our community. The outcome of this summit was a commitment on the part of the City and County working with community stakeholders to develop a collective impact framework and shared vision to make progress in this area. The following elements were identified as needed to move forward:

- Shared data processes and collaboration
- Shared diagnostic tools
- Shared definitions
- Sustainable
- Shared database
- Multi-organizational and community member leadership/steering team
- Compensate houseless individuals to advise and design solution
- Posit homelessness as an injustice/justice issue, eliminating barriers that are discriminatory and make policy changes

In response, beginning in July 2021, the City and County convened the Housing and Homeless Stakeholder group to guide the development of the collective impact framework, shared vision and ultimately the draft strategic plan that will be presented during the study session. The draft plan is a culmination of 18 months of work on the part of the stakeholder group, which has met at a minimum once a month since July 2021. While the need to develop a strategic plan was identified early on as a goal, in order to inform this short and long-term vision, the group supported the engagement of the University of Kansas Center for Public Partnerships and Research (KU CPPR) and the Corporation for Supportive Housing (CSH). The two needs assessments occurred in tandem with one another beginning in late 2021 and ending in mid-2022, with guidance from the stakeholders group every step of the way.

In reflecting on the findings of the two needs assessments, the stakeholder group began to identify next steps in organizing and developing the draft strategic plan that will be shared during this session. While the study session will focus on the overarching goal statement, objectives, and strategies, a copy of the full draft strategic plan is attached. It is important to note that this plan is still in draft form and will continue to be refined and revised as the work groups meet, consult with the County and City Commissions, and community members in the coming weeks and months. While the goal is to have a final plan back before the County and City Commissions in June, this plan will be a living document

that will be constantly monitored and updated as needed throughout the 5-year operating cycle the plan presumes.

Members of the Housing and Homelessness Stakeholder group will be on hand for the study session. We look forward to sharing this work with you and receive your questions and feedback.

RECOMMENDATION:

No action. For information purposes only.

Commented [MF2]: -Identify whether budget requests advance equitable outcomes for residents.
-Assess the equity impacts of budget decisions for potential burdens and benefits for communities of color and low-income communities.
-Ensure that programs, projects, plans, and investments help to reduce disparities.
-Require all improvement requests to apply an equity lens and apply equity approaches to overall budget development

Planned Strategy 6:
Identify major policy and project initiatives that ensure equitable access in housing and homeless services by specifically addressing and supporting restorative housing programs, development projects geared toward accessibility and strategies that support in sustaining housing reducing the risk of homelessness.

Action Steps for Strategy 6:

Commented [MF3]: What is the Restorative Housing Program?

The first reparations initiative developed by the City of Evanston is the Restorative Housing Program. The Program acknowledges the harm caused to African-American/Black Evanston residents due to discriminatory housing policies and practices and inaction on the part of the City from 1919-1969. The goal of the Program is to:

Revitalize, preserve and stabilize Black/African-American owner-occupied homes in Evanston

Increase homeownership and build the wealth of Black/African-American residents;

Build intergenerational equity amongst Black/African-American residents

Improve the retention rate of Black/African-American homeowners in the City of Evanston

Funds support the following initiatives:

Home Ownership: The Home Ownership initiative provides down payment/closing cost assistance to purchase real property located within the City.

Home Improvement: The Home Improvement initiative provides funds to repair, improve, or modernize real property located within the City.

Mortgage Assistance: Mortgage Assistance initiatives provide funds to pay down mortgage principal, interest, and/or late penalties for real property located within the City

Goal Statement/Issue Statement

The goal of the Homelessness and Housing Steering Committee is to develop a strategic planning framework that addresses homelessness and the need for affordable housing solutions throughout Douglas County.

Overall Objective

By 2028, create *a system that achieves functional zero through* policy, system, and environmental changes resulting in all Douglas County residents having access to the fundamental human right of safe, accessible, attainable, and affordable housing, and which homelessness is a rare and brief occurrence.

To reduce disparities and optimize equity...

What low-income populations will be focus of some efforts due to the presence of known disparities?

- Individuals experiencing chronic homelessness
- BIPOC individuals/households experiencing or at-risk of homelessness
- LGBTQ+ individuals/households experiencing or at-risk of homelessness
- Families w/ children under 18
- Single-parent, female-headed households
- Justice-involved/formerly incarcerated residents
- Individuals with Intellectual and Developmental Disability (IDD) in institutional setting
- Low Income seniors
- Transitional Youth, Unaccompanied Minors, and Youth aging out of foster care
- Individuals with substance use disorder (SUD) and severe and persistent mental illness (SPMI)
- Survivors of domestic violence, human trafficking, and/or stalking
- Immigrant individuals/households
- Individuals with English as second language
- Individuals with disabilities

To reduce disparities and optimize equity...

What strategies or approaches will be used to engage this population in influencing or shaping the plan?

- Utilize a trauma informed holistic approach throughout the development of policies and procedures
- Comprehensively review of the various land development codes and county regulations which create barriers in the development of programs and services
- Engage and empower individuals with lived experience in all aspects of planning, program

To reduce disparities and optimize equity...

Climate Change and Homelessness Have This In Common – A Systems Thinking Perspective

(Image Credit: Yesica [Prado](#). See [this link](#) for more information.)

Climate change and homeless have this in common: both are **symptoms**. Symptoms of what? A whole host of upstream factors that lead to the downstream conditions of global warming and people living on the streets. They are end-of-pipe issues. (In the case of climate change, it's an "end-of-pipe" issue in a literal sense.)

The point of this blog, however, is this:

The upstream conditions of climate change are not usually addressed in the same conversation as the downstream conditions, and this true about homelessness as well.

Focus area #1 – Equity and Inclusion

Racial disparities in who experiences homelessness warrant further attention. There are racial disparities in who experiences homelessness in Douglas County, with minority groups experiencing higher proportional representation among the homeless community.

Gender disparities in who experiences homelessness warrant further attention. The gender distribution of individuals experiencing homelessness is different than the national average.

Explore opportunities for engaging individuals with lived experience of homelessness to provide decision-making input. Continued, frequent, structured engagement of individuals with lived experience with community leaders and service providers is needed to drive decision-making in how human resources and community investments address homelessness

-2022 Douglas County Homelessness Needs Assessment

Focus area #2 – Affordable Housing

More affordable housing options are needed. There is not enough affordable housing for everyone who needs it and not enough property owners are willing to accept vouchers and other forms of rental assistance. Increased engagement with property owners to educate them about vouchers and other housing subsidies is needed to create more housing opportunities for low-income renters.

Deficit of population-specific housing options. In addition to free-market-rate affordable housing, there is a need for housing to meet the needs of specific populations.

Poor perception of voucher holders. Increased engagement with property owners and property managers are needed to increase available, affordable housing stock.

Focus area #3 – Supportive Housing

Permanent supportive housing options are needed. There are few permanent supportive housing units in Douglas County, which is necessary to address the needs of individuals who experience chronic homelessness.

-2022 Douglas County Homelessness Needs Assessment

In Douglas County, there is an estimated need of 381 total units of supportive housing. Of those 381 units of supportive housing, 356 are required to meet the needs of individual households or households with adults only, and 25 are needed to meet the needs of families.

-2022 Douglas County Supportive Housing Needs Assessment

Focus area #4 - Systems

A complete picture of the population experiencing homelessness is needed. The Homeless Management Information System (HMIS) is adequate to identify those with frequent interactions with the homelessness response system. Still, it fails to identify individuals who do not meet the strict Department of Housing and Urban Development (HUD) federal definition of homelessness, including many families. An incomplete picture of who is experiencing homelessness in Douglas County is a barrier to implementing effective homelessness interventions.

-2022 Douglas County Homelessness Needs Assessment

Focus area #4 - Systems

Continued and increased collaboration across providers is needed. A consistent, universal way of providers coming together to conduct Coordinated Entry and manage the By-Name list is necessary. All providers must communicate and collaborate to discuss the entirety of everyone in need.

-2022 Douglas County Homelessness Needs Assessment

Focus area #5 – Emergency Shelter

County- and city-funded efforts include continued funding of needed emergency shelter resources such as the Lawrence Community Shelter and additional emergency options in response to changing conditions such as freezing temperatures and the pandemic.

-2022 Douglas County Homelessness Needs Assessment

When housing costs are more affordable and housing opportunities are more readily available, there is a lower likelihood of households becoming homeless, and households who do become homeless can exit homelessness more quickly and with greater likelihood of sustaining that housing long-term.
